

- 📍 Point of Presence (POP)
- 📍 Virtual Point of Presence (VPOP)
- 📍 Metro Network
- National Access Network

SoftNET's global network covers many locations in Europe with our direct connections and is extendable to a much wider area when cooperating with our trusted partners.

While most of the internet lines cross Pacific, North America and Atlantic Ocean before hitting Europe, SoftNET had chosen westbound terrestrial optic lines via Russia which enable lower latency and make MPLS-VPN service in China a reliable and affordable networking option.
